PROFESSIONAL SUMMARY

Junior Backend .NET Developer with 1 year of hands-on experience designing and building secure, scalable RESTful APIs and backend systems using C#, ASP.NET Core Web API, Entity Framework Core, SQL Server, and Clean Architecture. Experienced with CQRS, SOLID principles, Dependency Injection, JWT authentication, LINQ, and modern design patterns. Strong focus on writing clean, maintainable, and high-performance code.

WORK EXPERIENCE

AI Model Trainer

Scale AI | Apr 2026 – Jul 2026

- Produced high-quality annotations for structured and unstructured datasets to improve AI model performance.
 - Evaluated database-related tasks and validated outputs against strict quality, accuracy, and consistency standards.
 - Performed data validation and quality assurance within defined performance targets for machine learning.
-

TRAINING EXPERIENCE

Full Stack .NET Developer Intern

Digital Egypt Pioneers Initiative (DEPI) | Nov 2025 – Aug 2026

- Developed web applications and RESTful APIs using C#, .NET Core, ASP.NET MVC, Entity Framework Core and SQL.
- Implemented backend features, optimized database queries, and applied OOP, SOLID principles, and clean coding.
- Worked in Agile Scrum teams using Git and GitHub for version control, sprint planning, testing, debugging, and code reviews.

Cyber Security Trainee

National Telecommunication Institute (NTI) | Nov 2025 – Dec 2025

- Applied networking and cybersecurity concepts to support secure application architecture and communication.
 - Strengthened application security awareness through firewall concepts, secure communication practices, and network security fundamentals.
-

EDUCATION

Faculty of Graduate Studies for Statistical Research (FGSSR), Cairo University

Postgraduate Academic Diploma in Computer Science | Sep 2026 – Oct 2028

Galala University | Sep 2022 – Jul 2026

Bachelor of Business Information System (BIS)

GPA: 3.28

TECHNICAL SKILLS

- **Programming Languages:** C#, C++, SQL, T-SQL

- **Backend Development:** ASP .NET Core, ASP.NET Core Web API, ASP.NET MVC, .NET Framework, RESTful APIs, WinForms
 - **Database & Data Access:** SQL Server, Entity Framework Core, EF Core, ADO.NET, Dapper, LINQ, Stored Procedures
 - **Architecture & Design:** Clean Architecture, CQRS, N-Tier Architecture, OOP, SOLID, Design Patterns, Repository Pattern, Dependency Injection
 - **Authentication & Security:** JWT Authentication, Refresh Tokens, Role-Based Authorization, HTTPS, CORS, Rate Limiting
 - **API & Backend Practices:** FluentValidation, ProblemDetails, Global Exception Handling, Result Pattern, Pagination
 - **Tools & Development:** Git, GitHub, Visual Studio, Swagger, JSON, XML, Agile, Scrum
-

PROJECTS

[Talaqah – CEFR Language Assessment Platform | Jun 2026 – Present](#)

- Developing a scalable ASP.NET Core Web API platform for CEFR-based English language assessment, supporting exam generation, student attempts, and proficiency reporting.
- Designed a five-layer Clean Architecture with strict dependency direction and feature-based application organization.
- Implemented a custom CQRS Mediator, Entity Framework Core, FluentValidation, JWT authentication, soft delete, audit logging, and Result Pattern.
- Integrated AI provider abstraction for Writing and Speaking evaluation, with support for OpenAI and Anthropic providers.
- Applied Dependency Injection, Strategy Pattern, pagination, global exception handling, SQL Server, ADO.NET, and stored procedures for backend performance and maintainability.

[SEEN – Sports Team Management REST API](#)

- Architected a modular ASP.NET Core Web API using N-Tier Architecture, SOLID principles, Dependency Injection, Repository and Service patterns.
- Implemented JWT authentication, refresh tokens, role-based authorization, custom middleware, HTTPS, CORS, and rate limiting
- Optimized SQL queries and stored procedures, reducing API response time by approximately 30%.

[Sales Management Desktop Application - .NET WinForms](#)

- Built a desktop sales management application using C#, WinForms, SQL Server, and Dapper with a layered architecture.
 - Designed a data access layer using Dapper, Repository Pattern, Dependency Injection, and DTOs.
 - Applied SOLID principles, centralized exception handling, and optimized database operations for maintainability and performance.
-

Licenses

- **Fortinet Certified Professional (FCP) - Network Security (NSE4)** | Fortinet.
