

Ehab Ayman Ahmed

Junior .NET Developer

Cairo, Egypt | +201145655800 | Ehab.Ayman7420@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | [YouTube](#)

PROFESSIONAL SUMMARY

Junior .NET Backend Developer with hands-on experience in building scalable web systems using C#, ASP.NET Core Web API, MVC, and SQL Server. Graduated with a capstone project SEEN and contributed to Mijas, focusing on layered architecture, database design, and maintainable code. I also create structured technical YouTube content that explains backend concepts and project construction, strengthening communication and technical clarity.

TECHNICAL SKILLS

- Programming Languages: C#, C++, Python
- .NET Technologies & Frameworks: .NET Framework, ASP.NET Core, ASP.NET MVC, Web API, WinForms
- Database & Data Access: SQL Server, T-SQL, Entity Framework, LINQ, ADO.NET
- Web Technologies & Data Formats: HTML, CSS, XML, JSON
- Core Concepts: OOP, Data Structures, Algorithms, Clean Architecture, RESTful APIs
- Tools & Version Control: Git, GitHub, Visual Studio

EXPERIENCE

Full Stack .NET Developer Intern

Digital Egypt Pioneers Initiative (DEPI) — Cairo, Egypt (Hybrid)

Nov 2025 – Present

- Built and enhanced data-driven web applications using C#, ASP.NET Core, MVC, and SQL Server.
- Developed RESTful Web APIs and managed data flow across application layers.
- Implemented relational database design and CRUD operations.
- Collaborated in Agile teams and optimized application performance.

Software Development Apprentice

Programming Advices — Remote

Oct 2023 – Present

- Completed structured training in C++, C#, .NET Framework, and SQL Server.
- Built backend and desktop applications using WinForms and database-driven logic.
- Applied OOP, algorithms, and real-world problem-solving techniques.

Cyber Security Trainee

National Telecommunication Institute (NTI) — Cairo, Egypt

Nov 2025 – Dec 2025

- Trained in cybersecurity fundamentals, networking, and FortiGate firewall configuration.
- Applied security principles to software and system design.

PROJECTS

SEEN – Sports Team Management System (Graduation Project | Ongoing)

- Developing a full-stack sports team management system with mobile and web applications connected through RESTful APIs.
- Designed a layered backend architecture using ASP.NET Core Web API to manage teams, subscriptions, and role-based access.
- Implemented scalable business logic and relational database design using SQL Server.
- Focused on maintainability, scalability, and clean separation of concerns.

Technologies: C#, ASP.NET Core Web API, SQL Server, RESTful APIs, Layered Architecture, Flutter

Driving & Vehicle License Department (DVLD) System

- Developed a desktop application to manage driver licenses, vehicle registrations, and testing workflows.
- Implemented full CRUD operations using WinForms with database connectivity via ADO.NET.
- Applied a 3-tier architecture with secure authentication, validation, and error handling.

Technologies: C#, WinForms, SQL Server, ADO.NET, 3-Tier Architecture

Mini Exams Online System

- Built a web-based system for creating, managing, and evaluating online exams.
- Implemented role-based access control and exam result tracking.
- Developed backend logic using ASP.NET Core and ADO.NET with SQL Server.

Technologies: C#, ASP.NET Core, Razor Pages, SQL Server, ADO.NET, MVC

EDUCATION

Galala University

Bachelor of Technology (BIS) in Computer and Information Technology

Sep 2022 – Jun 2026
